

Flat style barriers with notches & joiners, optional feet 1/4" clear polycarbonate

1/4" Clear Polycarbonate, bullnose edges
Polycarbonate will not crack or shatter
Assemble unit with a hammer (friction fit)

Example Unit

Radius Corners 1/4"

Notches for joiners
(notches line up on different heights to allow mixing of heights)

Notches for feet (optional)
Only needed on unsecured corners or middle of long sections (5'+)

You will generally have notches for joiners OR feet on a side, not both

Flat style barriers with notches & joiners, optional feet

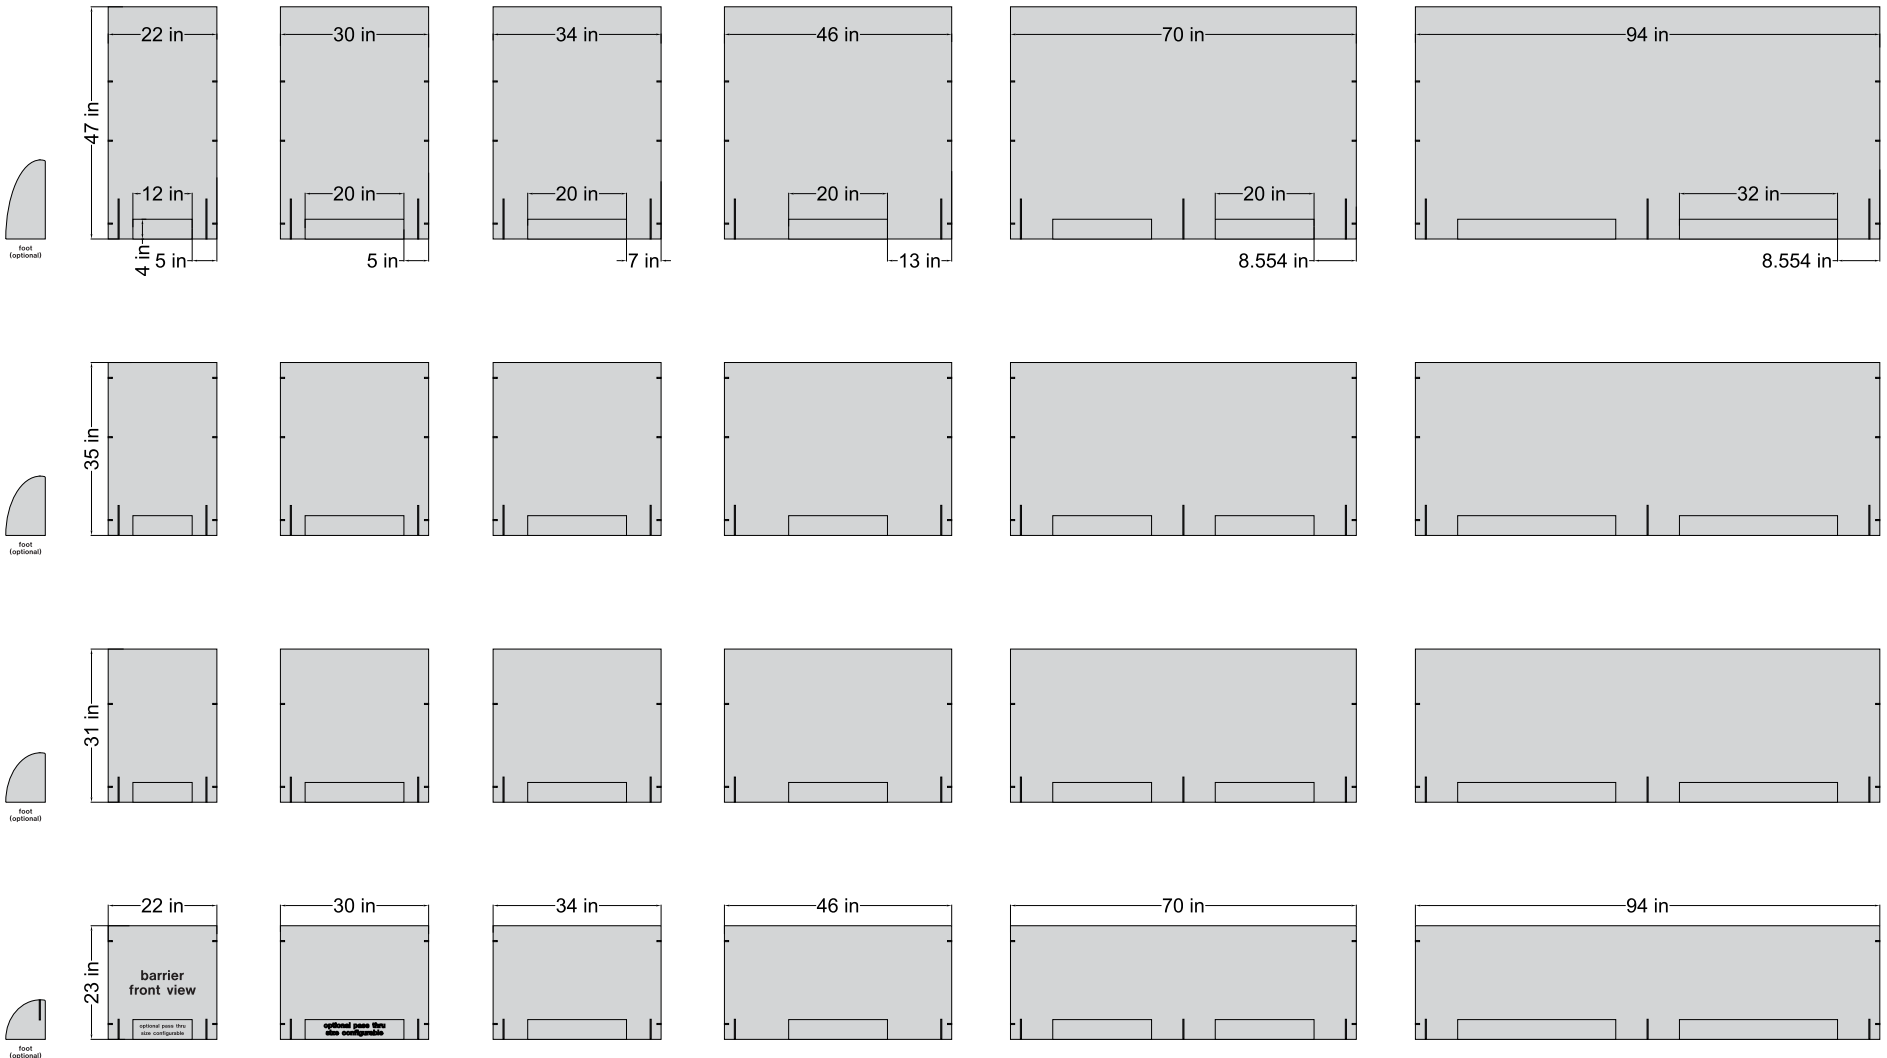

Main barrier sizes. Most openings are 4" x 12", 4" x 20", or 4" x 32", but are customizable.

Barrier sizes are slightly narrower than our regular stand up barriers to account for extra room taken up by side pieces (once connected)

Although shown, foot slots are only really required for pieces wider than 34" where the side is not connected to another piece, or in the middle of 70"+ long pieces for extra support

You may connect as many pieces as you wish together using the connectors shown as page 1.

Barrier sizes can be customised as well, you are not limited to the sizes below.

Flat style barriers with notches & joiners, optional feet

These pieces are just narrow versions of the barriers with no openings and no leg slots. They act as side supports or other connectors
